*Interim Statement of Profit or Loss and Other Comprehensive Income for the six- months period ended
30 June 2019*

	Notes	1 April 2019 30 June 2019 AMD'000	1 January 2019 30 June 2019 AMD'000	1 April 2018 30 June 2018 AMD'000	1 January 2018 30 June 2018 AMD'000
Interest income calculated using the effective interest method	5	1,651,874	3,368,552	1,591,699	3,101,272
Interest expense	5	(969,070)	(1,941,146)	(1,036,105)	(2,048,664)
Net interest income	5	682,804	1,427,406	555,594	1,052,608
Fee and commission income		34,021	62,938	25,953	51,182
Fee and commission expense		(21,746)	(40,344)	(16,394)	(31,431)
Net fee and commission income		12,275	22,594	9,559	19,751
Net foreign exchange (loss)/gain		(16,770)	4,738	19,802	13,403
Net realised gain on investment securities		-	-	282,510	283,497
Other operating (expenses) / income, net		(21,472)	357,558	(21,858)	(44,216)
Operating income		656,837	1,812,296	845,607	1,325,043
Impairment release/(losses) on investment securities and other financial assets, loans to customers and loan commitments	6	241,558	268,365	(111,979)	(112,203)
Personnel expenses		(166,500)	(327,585)	(153,733)	(315,039)
Other general administrative expenses	7	(123,803)	(276,687)	(127,979)	(229,680)
Profit before income tax		608,092	1,476,389	451,916	668,121
Income tax (expense)/benefit	8	(135,778)	(312,107)	29,111	(76,042)
Profit for the period		472,314	1,164,282	481,027	592,079
Other comprehensive income for the period, net of income tax					
<i>Items that are or may be reclassified subsequently to profit or loss:</i>					
Movement in fair value reserve for investment securities:					
- net change in fair value		245,158	80,998	(177,255)	144,545
- net amount reclassified to profit or loss		-	-	(231,772)	(232,850)
Other comprehensive income/(loss) for the period, net of income tax		245,158	80,998	(409,027)	(88,305)
Total comprehensive income for the period		717,472	1,245,280	72,000	503,774

The financial statements as set out on pages 3 to 67 were approved by management on 15 July 2019 and were signed on its behalf by:

Hayk Stepanyan
Chief Executive Officer

Ani Sargsyan
Head of Finance and Administration

The interim statement of profit or loss and other comprehensive income is to be read in conjunction with the notes to, and forming part of, the interim financial statements.

Byblos Bank Armenia ejsc
Interim Statement of Financial Position as at 30 June 2019

	Notes	30 June 2019 AMD'000	31 December 2018 AMD'000
ASSETS

The interim statement of changes in equity is to be read in conjunction with the notes to, and forming part of, the interim financial statements.

1 Background

(a) Organisation and operations

Byblos Bank Armenia cjsc (the Bank) was established in 2007 under the laws of the Republic of Armenia.

The principal activities of the Bank are deposit taking and customer account maintenance, lending, cash and settlement transactions and operations with securities and foreign exchange. The activities of the Bank are regulated by the Central Bank of Armenia (CBA). The Bank has a general banking license, and is a member of the state deposit insurance system in the Republic of Armenia.

The Bank's registered head office is 18/3 Amiryan Street, Yerevan, Republic of Armenia. The Bank has two branches.

The majority of the assets and liabilities are located in the Republic of Armenia.

The Bank is wholly-owned by Byblos Bank SAL. The ultimate controlling party is a single individual Francois Bassil.

Related party transactions are described in detail in Note 25.

(b) Armenian business environment

The Bank's operations are located in Armenia. Consequently, the Bank is exposed to the economic and financial markets of Armenia which display characteristics of an emerging market. The legal, tax and regulatory frameworks continue development, but are subject to varying interpretations and frequent changes which together with other legal and fiscal impediments contribute to the challenges faced by entities operating in Armenia.

The financial statements reflect management's assessment of the impact of Armenian business environment on the operations and the financial position of the Bank. The future business environment may differ from management's assessment.

2 Basis of preparation

(a) Statement of compliance

The interim condensed financial statements are prepared in accordance with IAS 34 *Interim Financial Reporting*, and should be read in conjunction with the Bank's last annual financial statements as at and for the year ended 31 December 2018 ("last annual financial statements"). They do not include all of the information required for a complete set of IFRS financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Bank's financial position and performance since the last annual financial statements.

(b) Basis of measurement

The financial statements are prepared on the historical cost basis except that investment securities at fair value through other comprehensive income (FVOCI) are stated at fair value.

Functional and presentation currency

The functional currency of the Bank is the Armenian Dram (AMD) as, being the national currency of the Republic of Armenia, it reflects the economic substance of the majority of underlying events and circumstances relevant to them.

The AMD is also the presentation currency for the purposes of these interim financial statements.

Financial information presented in AMD is rounded to the nearest thousand.

(c) Use of estimates and judgments

In preparing these interim financial statements, management has made judgement, estimates and assumptions that affect the application of the Bank's accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Judgements

Information about judgements made in applying accounting policies that have the most significant effects on the amounts recognised in the interim financial statements is included in the following notes:

- classification of financial assets: assessment of the business model within which the assets are held and assessment of whether the contractual terms of the financial asset are solely payments of principal and interest on the principal amount outstanding – Note 3(e)(i).
- establishing the criteria for determining whether credit risk on the financial asset has increased significantly since initial recognition, determining methodology for incorporating forward-looking information into measurement of ECL and selection and approval of models used to measure ECL – Note 21(b).

Assumptions and estimations uncertainty

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment is included in the following notes:

- impairment of financial instruments: determining inputs into the ECL measurement model, including incorporation of forward-looking information – Note 21(b);
- estimates of fair values of financial assets and liabilities – Note 26;
- fair value of forward and option instruments of loans from a related party and subordinated loans from Parent – Notes 18 and 19.

(d) Changes in accounting policies and presentation

The Bank has initially adopted IFRS 9 and IFRS 15 from 1 January 2018. A number of other new standards are also effective from 1 January 2018 but they do not have a material effect on the Bank's financial statements.

The effect of initially applying IFRS 9 is mainly attributed to the following:

- an increase in impairment losses recognised on financial assets (see Note 4);

- additional disclosures related to IFRS 9 (see Notes 21 (b) and 4).

The adoption of IFRS 15 did not impact the timing or amount of fee and commission income from contracts with customers and the related assets and liabilities recognised by the Bank.

IFRS 9 Financial Instruments

IFRS 9 sets out requirements for recognising and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items. This standard replaces IAS 39 *Financial Instruments: Recognition and Measurement*. The requirements of IFRS 9 represent a significant change from IAS 39. The new standard brings fundamental changes to the accounting for financial assets and to certain aspects of the accounting for financial liabilities.

As a result of the adoption of IFRS 9, the Bank has adopted consequential amendments to IAS 1 *Presentation of Financial Statements*, which require separate presentation in the statement of profit or loss and other comprehensive income of interest revenue calculated using the effective interest method. Previously, the Bank disclosed this amount in notes to the financial statements.

Additionally, the Bank has adopted consequential amendments to IFRS 7 *Financial Instruments: Disclosures* that are applied to disclosures about 2018 but have not been applied to the comparative information.

The key changes to the Bank's accounting policies resulting from its adoption of IFRS 9 are summarised below.

Classification of financial assets and financial liabilities

IFRS 9 contains three principal classification categories for financial assets: measured at amortised cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL). IFRS 9 classification is generally based on the business model in which a financial asset is managed and its contractual cash flows. The standard eliminates the existing IAS 39 categories of held-to-maturity, loans and receivables and available-for-sale. Under IFRS 9, derivatives embedded in contracts where the host is a financial asset in the scope of the standard are never bifurcated. Instead, the whole hybrid instrument is assessed for classification. For an explanation of how the Bank classifies financial assets under IFRS 9, see Note 3(e)(i).

IFRS 9 largely retains the existing requirements in IAS 39 for the classification of financial liabilities. However, although under IAS 39 all fair value changes of liabilities designated under the fair value option were recognised in profit or loss, under IFRS 9 fair value changes are generally presented as follows:

- the amount of change in the fair value that is attributable to changes in the credit risk of the liability is presented in other comprehensive income; and
- the remaining amount of change in the fair value is presented in profit or loss.

For an explanation of how the Bank classifies financial liabilities under IFRS 9, see Note 3(e)(i).

Impairment of financial assets

IFRS 9 replaces the 'incurred loss' model in IAS 39 with an 'expected credit loss' model. The new impairment model also applies to certain loan commitments and financial guarantee contracts but not to equity investments.

Under IFRS 9, credit losses are recognised earlier than under IAS 39. For an explanation of how the Bank applies the impairment requirements of IFRS 9, see Note 3(e)(iv).

Transition

Changes in accounting policies resulting from the adoption of IFRS 9 have been applied retrospectively, except as described below.

- Comparative periods have not been restated. Differences in the carrying amounts of financial assets and financial liabilities resulting from the adoption of IFRS 9 are recognised in retained earnings and reserves as at 1 January 2018.
- The following assessments have been made on the basis of the facts and circumstances that existed at the date of initial application.
 - The determination of the business model within which a financial asset is held.
 - The designation of certain investments in equity instruments not held for trading as at FVOCI.
- If a debt security had low credit risk at the date of initial application of IFRS 9, then the Bank has assumed that credit risk on the asset had not increased significantly since its initial recognition.

For more information and details on the changes and implications resulting from the adoption of IFRS 9, see Note 4.

3 Significant accounting policies

Except for the changes disclosed in Note 2(e), the Bank has consistently applied the following accounting policies to all periods presented in these interim financial statements.

(a) Foreign currency

Transactions in foreign currencies are translated to the functional currency of the Bank at exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between amortized cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortized cost in foreign currency translated at the exchange rate at the end of the reporting period.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value is determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

Foreign currency differences arising on retranslation are recognized in profit or loss, except for differences arising on the retranslation of available-for-sale equity instruments unless the difference is due to impairment in which case foreign currency differences that have been recognized in other comprehensive income are reclassified to profit or loss.

(b) Cash and cash equivalents

Cash and cash equivalents include notes and coins on hand, unrestricted balances (nostro accounts) held with the CBA and other banks. The minimum reserve deposit with the CBA is not considered to be a cash equivalents, due to restrictions on its withdrawability. Cash and cash equivalents are carried at amortised cost in the statement of financial position.

(c) Interest

Effective interest rate

Interest income and expense are recognised in profit or loss using the effective interest method. The ‘effective interest rate’ is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

When calculating the effective interest rate for financial instruments other than purchased or originated credit-impaired assets, the Bank estimates future cash flows considering all contractual terms of the financial instrument, but not expected credit losses. For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated using estimated future cash flows including expected credit losses.

The calculation of the effective interest rate includes transaction costs and fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability.

Amortised cost and gross carrying amount

The ‘amortised cost’ of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance.

The ‘gross carrying amount of a financial asset’ measured at amortised cost is the amortised cost of a financial asset before adjusting for any expected credit loss allowance.

Calculation of interest income and expense

The effective interest rate of a financial asset or financial liability is calculated on initial recognition of a financial asset or a financial liability. In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. The effective interest rate is revised as a result of periodic re-estimation of cash flows of floating rate instruments to reflect movements in market rates of interest. The effective interest rate is also revised for fair value hedge adjustments at the date amortisation of the hedge adjustment begins.

However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

For financial assets that were credit-impaired on initial recognition, interest income is calculated by applying the credit-adjusted effective interest rate to the amortised cost of the asset. The calculation of interest income does not revert to a gross basis, even if the credit risk of the asset improves.

For information on when financial assets are credit-impaired, see Note 3(e)(iv).

Presentation

Interest income calculated using the effective interest method presented in the statement of profit or loss and other comprehensive income includes:

- interest on financial assets measured at amortised cost;
- interest on debt instruments measured at FVOCI.

Interest expense presented in the statement of profit or loss and other comprehensive income includes financial liabilities measured at amortised cost.

(d) Fees and commission

Fee and commission income and expense that are integral to the effective interest rate on a financial asset or financial liability are included in the effective interest rate (see Note 3(c)).

Other fee and commission income – including account servicing fees, investment management fees, sales commission, placement fees and syndication fees – is recognised as the related services are performed. If a loan commitment is not expected to result in the draw-down of a loan, then the related loan commitment fee is recognised on a straight-line basis over the commitment period.

A contract with a customer that results in a recognised financial instrument in the Bank's financial statements may be partially in the scope of IFRS 9 and partially in the scope of IFRS 15. If this is the case, then the Bank first applies IFRS 9 to separate and measure the part of the contract that is in the scope of IFRS 9 and then applies IFRS 15 to the residual.

Other fee and commission expenses relate mainly to transaction and service fees, which are expensed as the services are received.

(e) Financial assets and financial liabilities

i. Classification

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost, FVOCI or FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For debt financial assets measured at FVOCI, gains and losses are recognised in other comprehensive income, except for the following, which are recognised in profit or loss in the same manner as for financial assets measured at amortised cost:

- interest income using the effective interest method;
- ECL and reversals; and
- foreign exchange gains and losses.

When a debt financial asset measured at FVOCI is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss.

On initial recognition of an equity investment that is not held for trading, the Bank may irrevocably elect to present subsequent changes in fair value in other comprehensive income. This election is made on an investment-by-investment basis.

Gains and losses on such equity instruments are never reclassified to profit or loss and no impairment is recognised in profit or loss. Dividends are recognised in profit or loss unless they clearly represent a recovery of part of the cost of the investment, in which case they are recognised in other comprehensive income. Cumulative gains and losses recognised in other comprehensive income are transferred to retained earnings on disposal of an investment.

All other financial assets are classified as measured at FVTPL.

In addition, on initial recognition, the Bank may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Business model assessment

The Bank makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Bank's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Bank's stated objective for managing the financial assets is achieved and how cash flows are realised.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the

credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Bank considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Bank considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Bank's claim to cash flows from specified assets (e.g. non-recourse asset arrangements); and
- features that modify consideration of the time value of money – e.g. periodical reset of interest rates.

Reclassification

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Bank changes its business model for managing financial assets.

Financial liabilities

The Bank classifies its financial liabilities, other than financial guarantees and loan commitments, as measured at amortised cost or FVTPL.

Reclassification

Financial liabilities are not reclassified subsequent to their initial recognition.

ii. Derecognition

Financial assets

The Bank derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Bank neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognised in other comprehensive income is recognised in profit or loss.

From 1 January 2018 any cumulative gain/loss recognised in other comprehensive income in respect of equity investment securities designated as at FVOCI is not recognised in profit or loss on derecognition of such securities, as explained in Note 3(e)(i). Any interest in transferred financial assets that qualify for derecognition that is created or retained by the Bank is recognised as a separate asset or liability.

The Bank enters into transactions whereby it transfers assets recognised on its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets or a portion of them. In such cases, the transferred assets are not derecognised. Examples of such transactions are securities lending and sale-and-repurchase transactions.

In transactions in which the Bank neither retains nor transfers substantially all of the risks and rewards of ownership of a financial asset and it retains control over the asset, the Bank continues to recognise the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset.

Financial liabilities

The Bank derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

iii. Modification of financial assets and financial liabilities

Financial assets

If the terms of a financial asset are modified, the Bank evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different (referred to as ‘substantial modification’), then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognised and a new financial asset is recognised at fair value plus any eligible transaction costs. Any fees received as part of the modification are accounted for as follows:

- fees that are considered in determining the fair value of the new asset and fees that represent reimbursement of eligible transaction costs are included in the initial measurement of the asset; and
- other fees are included in profit or loss as part of the gain or loss on derecognition.

Changes in cash flows on existing financial assets or financial liabilities are not considered as modification, if they result from existing contractual terms, e.g. changes in interest rates initiated by the Bank due to changes in the CBA key rate, if the loan agreement entitles the Bank to do so.

The Bank performs a quantitative and qualitative evaluation of whether the modification is substantial, i.e. whether the cash flows of the original financial asset and the modified or replaced financial asset are substantially different. The Bank assesses whether the modification is substantial based on quantitative and qualitative factors in the following order: qualitative factors, quantitative factors, combined effect of qualitative and quantitative factors. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset deemed to have expired. In making this evaluation the Bank analogizes to the guidance on the derecognition of financial liabilities.

The Bank concludes that the modification is substantial as a result of the following qualitative factors:

- change the currency of the financial asset;
- change in collateral or other credit enhancement
- change of terms of financial asset that lead to non-compliance with the SPPI criterion.

If cash flows are modified when the borrower is in financial difficulties, then the objective of the modification is usually to maximise recovery of the original contractual terms rather than to originate a new asset with substantially different terms. If the Bank plans to modify a financial asset in a way that would result in forgiveness of cash flows, then it first considers whether a portion of

the asset should be written off before the modification takes place (see below for write-off policy). This approach impacts the result of the quantitative evaluation and means that the derecognition criteria are not usually met in such cases. The Bank further performs qualitative evaluation of whether the modification is substantial.

If the modification of a financial asset measured at amortised cost or FVOCI does not result in derecognition of the financial asset, then the Bank first recalculates the gross carrying amount of the financial asset using the original effective interest rate of the asset and recognises the resulting adjustment as a modification gain or loss in profit or loss. For floating-rate financial assets, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs or fees incurred and fees received as part of the modification adjust the gross carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset.

If such a modification is carried out because of financial difficulties of the borrower, then the gain or loss is presented together with impairment losses. In other cases, it is presented as interest income calculated using the effective interest method.

For fixed-rate loans, where the borrower has an option to prepay the loan at par without significant penalty, the Bank treats the modification of an interest rate to a current market rate using the guidance on floating-rate financial instruments. This means that the effective interest rate is adjusted prospectively.

Financial liabilities

The Bank derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in profit or loss. Consideration paid includes non-financial assets transferred, if any, and the assumption of liabilities, including the new modified financial liability.

Bank performs a quantitative and qualitative evaluation of whether the modification is substantial considering qualitative factors, quantitative factors and combined effect of qualitative and quantitative factors. The Bank concludes that the modification is substantial as a result of the following qualitative factors:

- change the currency of the financial liability;
- change in collateral or other credit enhancement;
- inclusion of conversion option;
- change in the subordination of the financial liability.

For the quantitative assessment the terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial liability.

If the modification of a financial liability is not accounted for as derecognition, then the amortised cost of the liability is recalculated by discounting the modified cash flows at the original effective interest rate and the resulting gain or loss is recognised in profit or loss. For floating-rate financial liabilities, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs and fees incurred are recognised as an adjustment to the carrying amount of the liability and amortised over the

remaining term of the modified financial liability by re-computing the effective interest rate on the instrument.

Impairment

See also Note 21(b).

The Bank recognises loss allowances for expected credit losses (ECL) on the following financial instruments that are not measured at FVTPL:

- financial assets that are debt instruments;
- financial guarantee contracts issued; and
- loan commitments issued.

No impairment loss is recognised on equity investments.

The Bank measures loss allowances at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:

- debt investment securities that are determined to have low credit risk at the reporting date; and
- other financial instruments on which credit risk has not increased significantly since their initial recognition (see Note 21(b)).

The Bank does not apply the low credit risk exemption to any financial instruments.

12-month ECL are the portion of ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Financial instruments for which a 12-month ECL is recognised are referred to as ‘Stage 1’ financial instruments.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of the financial instrument. Financial instruments for which a lifetime ECL is recognised are referred to as ‘Stage 2’ financial instruments.

Measurement of ECL

ECL are a probability-weighted estimate of credit losses. They are measured as follows:

- *financial assets that are not credit-impaired at the reporting date*: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Bank expects to receive);
- *financial assets that are credit-impaired at the reporting date*: as the difference between the gross carrying amount and the present value of estimated future cash flows;
- *undrawn loan commitments*: as the present value of the difference between the contractual cash flows that are due to the Bank if the commitment is drawn down and the cash flows that the Bank expects to receive; and
- *financial guarantee contracts*: the present value of expected payments to reimburse the holder less any amounts that the Bank expects to recover.

See also Note 21(b).

Restructured financial assets

If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made of whether the financial asset should be derecognised (see note 3(e)(ii)) and ECL are measured as follows.

- If the expected restructuring will not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating the cash shortfalls from the existing asset (see Note 21(b)).
- If the expected restructuring will result in derecognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its derecognition. This amount is included in calculating the cash shortfalls from the existing financial asset that are discounted from the expected date of derecognition to the reporting date using the original effective interest rate of the existing financial asset.

Credit-impaired financial assets

At each reporting date, the Bank assesses whether financial assets carried at amortised cost and debt financial assets carried at FVOCI are credit-impaired (referred to as ‘Stage 3 financial assets’). A financial asset is ‘credit-impaired’ when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or past due event;
- the restructuring of a loan or advance by the Bank on terms that the Bank would not consider otherwise;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

A loan that has been renegotiated due to a deterioration in the borrower’s condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. In addition, a retail loan that is overdue for 90 days or more is considered credit-impaired.

In making an assessment of whether an investment in sovereign debt is credit-impaired, the Bank considers the following factors.

- The market’s assessment of creditworthiness as reflected in the bond yields.
- The rating agencies’ assessments of creditworthiness.
- The country’s ability to access the capital markets for new debt issuance.
- The probability of debt being restructured, resulting in holders suffering losses through voluntary or mandatory debt forgiveness.
- The international support mechanisms in place to provide the necessary support as ‘lender of last resort’ to that country, as well as the intention, reflected in public statements, of governments and agencies to use those mechanisms. This includes an assessment of the depth of those mechanisms and, irrespective of the political intent, whether there is the capacity to fulfil the required criteria.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for ECL are presented in the statement of financial position as follows:

- *financial assets measured at amortised cost*: as a deduction from the gross carrying amount of the assets;
- *loan commitments and financial guarantee contracts*: generally, as a provision;
- *where a financial instrument includes both a drawn and an undrawn component, and the Bank cannot identify the ECL on the loan commitment component separately from those on the drawn component*: the Bank presents a combined loss allowance for both components. The combined amount is presented as a deduction from the gross carrying amount of the drawn component. Any excess of the loss allowance over the gross amount of the drawn component is presented as a provision; and
- *debt instruments measured at FVOCI*: no loss allowance is recognised in the statement of financial position because the carrying amount of these assets is their fair value. However, the loss allowance is disclosed and is recognised in the fair value reserve.

Write-offs

Loans and debt securities are written off (either partially or in full) when there is no reasonable expectation of recovering a financial asset in its entirety or a portion thereof. This is generally the case when the Bank determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. This assessment is carried out at the individual asset level.

Recoveries of amounts previously written off are included in ‘impairment losses on financial instruments’ in the statement of profit or loss and other comprehensive income.

Financial assets that are written off could still be subject to enforcement activities in order to comply with the Bank’s procedures for recovery of amounts due.

Non-integral financial guarantee contracts

The Bank assesses whether a financial guarantee contract held is an integral element of a financial asset that is accounted for as a component of that instrument or is a contract that is accounted for separately. The factors that the Bank considers when making this assessment include whether:

- the guarantee is implicitly part of the contractual terms of the debt instrument;
- the guarantee is entered into at the same time as and in contemplation of the debt instrument; and
- the guarantee is given by the parent of the borrower or another company within the borrower’s group.

If the Bank determines that the guarantee is an integral element of the financial asset, then any premium payable in connection with the initial recognition of the financial asset is treated as a transaction cost of acquiring it. The Bank considers the effect of the protection when measuring the fair value of the debt instrument and when measuring ECL.

If the Bank determines that the guarantee is not an integral element of the debt instrument, then it recognises an asset representing any prepayment of guarantee premium and a right to compensation for credit losses. A prepaid premium asset is recognised only if the guaranteed exposure neither is credit-impaired nor has undergone a significant increase in credit risk when the guarantee is

acquired. These assets are recognised in ‘other assets’. The Bank presents gains or losses on a compensation right in profit or loss in the line item ‘impairment losses on debt financial assets’.

iv. Designation at fair value through profit or loss

Financial assets

At initial recognition, the Bank has designated certain financial assets as at FVTPL because this designation eliminates or significantly reduces an accounting mismatch, which would otherwise arise.

Financial liabilities

The Bank has designated certain financial liabilities as at FVTPL in either of the following circumstances:

- the liabilities are managed, evaluated and reported internally on a fair value basis; or
- the designation eliminates or significantly reduces an accounting mismatch that would otherwise arise.

(f) Embedded derivatives

Derivatives may be embedded in another contractual arrangement (a host contract). The Bank accounts for an embedded derivative separately from the host contract when:

- the host contract is not an asset in the scope of IFRS 9;
- the host contract is not itself carried at FVTPL;
- the terms of the embedded derivative would meet the definition of a derivative if they were contained in a separate contract; and
- the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host contract.

Separated embedded derivatives are measured at fair value, with all changes in fair value recognised in profit or loss unless they form part of a qualifying cash flow or net investment hedging relationship.

(g) Loans to customers

‘Loans to customers’ caption in the statement of financial position include loans to customers measured at amortised cost (see Note 3(e)(i)); they are initially measured at fair value plus incremental direct transaction costs, and subsequently at their amortised cost using the effective interest method.

(h) Investment securities

The ‘investment securities’ caption in the statement of financial position includes:

- debt securities measured at FVOCI (see Note 3(e)(i)); and
- equity investment securities designated as at FVOCI (see Note 3(e)(i)).

(i) Deposits, debt securities issued and subordinated liabilities

Deposits, debt securities issued and subordinated liabilities are initially measured at fair value minus incremental direct transaction costs, and subsequently measured at their amortised cost using the effective interest method, except where the Bank designates liabilities at FVTPL.

(j) Financial guarantees and loan commitments

Financial guarantees are contracts that require the Bank to make specified payments to reimburse the holder for a loss that it incurs because a specified debtor fails to make payment when it is due in accordance with the terms of a debt instrument. Loan commitments are firm commitments to provide credit under pre-specified terms and conditions.

Financial guarantees issued or commitments to provide a loan at a below-market interest rate are initially measured at fair value. Subsequently, they are measured as follows: at the higher of the loss allowance determined in accordance with IFRS 9 (see Note 3(e)(iv)) and the amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of IFRS 15; and

The Bank has issued no loan commitments that are measured at FVTPL.

For other loan commitments the Bank recognises a loss allowance (see Note 3(e)(iv)) in accordance with IFRS 9;

Liabilities arising from financial guarantees and loan commitments are included within provisions.

(k) Property and equipment

(i) Owned assets

Items of property and equipment are stated at cost less accumulated depreciation and impairment losses.

Where an item of property and equipment comprises major components having different useful lives, they are accounted for as separate items of property and equipment.

(ii) Depreciation

Depreciation is charged to profit or loss on a straight-line basis over the estimated useful lives of the individual assets. Depreciation commences on the date of acquisition or, in respect of internally constructed assets, from the time an asset is completed and ready for use. The estimated useful lives are as follows:

– Buildings	50 years
– computers and communication equipment	1-5 years
– fixtures and fittings	5-10 years
– motor vehicles	5 years

Leasehold improvements are depreciated over the shorter of the useful life of the asset and lease term.

(l) Intangible assets

Acquired intangible assets are stated at cost less accumulated amortization and impairment losses.

Acquired computer software licenses are capitalized on the basis of the costs incurred to acquire and bring to use the specific software.

Amortization is charged to profit or loss on a straight-line basis over the estimated useful lives of intangible assets. The estimated useful lives range from 1-10 years.

(m) Repossessed assets

The Bank recognizes repossessed assets in the statement of financial position when it has the full and final settlement rights to the collateral.

Repossessed assets are measured at the lower of the carrying amount and the fair value less costs to sell. At initial recognition repossessed assets are measured based on the carrying value of the defaulted loan, including expenditure incurred in the process of collateral foreclosure. Fair value less costs to sell is the estimated selling price of the collateral in the ordinary course of business, less the related selling costs. Subsequent to initial recognition, repossessed assets are reviewed for held for sale classification criteria and are reclassified accordingly when the criteria are met.

Gains and losses on disposal of repossessed assets are recognized net in “other operating income” in profit or loss.

(n) Impairment of non-financial assets

Other non financial assets, other than deferred taxes, are assessed at each reporting date for any indications of impairment. The recoverable amount of non financial assets is the greater of their fair value less costs to sell and value in use.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs. An impairment loss is recognized when the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount.

All impairment losses in respect of non financial assets are recognized in profit or loss and reversed only if there has been a change in the estimates used to determine the recoverable amount. Any impairment loss reversed is only reversed to the extent that the asset’s carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

(o) Provisions

A provision is recognized in the statement of financial position when the Bank has a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

(p) Share capital

(i) Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of

ordinary shares and share options are recognized as a deduction from equity, net of any tax effects.

(ii) Share premium

Any amount paid in excess of par value of shares issued is recognized as share premium.

(iii) Dividends

The ability of the Bank to declare and pay dividends is subject to the rules and regulations of the Armenian legislation.

Dividends in relation to ordinary shares are reflected as an appropriation of retained earnings in the period when they are declared.

(q) Taxation

Income tax comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items of other comprehensive income or transactions with shareholders recognized directly in equity, in which case it is recognized within other comprehensive income or directly within equity.

(i) Current tax

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

(ii) Deferred tax

Deferred tax assets and liabilities are recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax assets and liabilities are not recognized for the initial recognition of assets or liabilities that affect neither accounting nor taxable profit.

The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow the manner in which the Bank expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax assets and liabilities, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

Deferred tax assets and liabilities are measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

Deferred tax assets are recognized only to the extent that it is probable that future taxable profits will be available against which the temporary differences, unused tax losses and credits can be utilized. Deferred tax assets are reduced to the extent that taxable profit will be available against which the deductible temporary differences can be utilized.

(r) Leases

(i) Operating – Bank as lessee

Leases of assets under which the risks and rewards of ownership are effectively retained by the lessor are classified as operating leases. Lease payments under an operating lease are recognised as expenses on a straight-line basis over the lease term and included into other operating expenses.

(s) Standards issued but not yet effective

A number of new standards and amendments to standards are effective for annual periods beginning after 1 January 2019 and earlier application if permitted; however, the Bank has not early adopted the following new or amended standards in the preparing these interim condensed financial statements.

The Bank has no updates to information provided in the last annual financial statements about the standards issued but not yet effective that may have a significant impact on the Bank’s interim condensed financial statements.

4 Transition to IFRS 9

Classification of financial assets and financial liabilities on the date of initial application of IFRS 9

The following table shows the original measurement categories in accordance with IAS 39 and the new measurement categories under IFRS 9 for the Bank’s financial assets as at 1 January 2018.

AMD’000	Note	Original classification under IAS 39	New classification under IFRS 9	Original carrying amount under IAS 39	New carrying amount under IFRS 9
Financial assets					
		Loans and			
Cash and cash equivalents	9	receivables	Amortised cost	7,408,502	7,408,399
Investment securities – debt (a)	13	Available for sale	FVOCI	26,065,834	26,065,834
Investment securities – equity (b)	13	Available for sale	FVOCI	13,160	13,160
Amounts receivable under reverse repurchase agreements	10	Loans and receivables	Amortised cost	10,049,975	10,049,975
Loans to banks	11	Loans and receivables	Amortised cost	11,291,962	11,291,747
Loans to customers	12	Loans and receivables	Amortised cost	28,540,823	28,771,823
Total financial assets				83,370,256	83,600,938

The Bank’s accounting policies on the classification of financial instruments under IFRS 9 are set out in Note 3(e)(i). The application of these policies resulted in the reclassifications set out in the table above and explained below:

- a. Certain debt securities are held by the Bank in separate portfolios to meet everyday liquidity needs. The Bank seeks to minimise the costs of managing those liquidity needs and therefore actively manages the return on the portfolio. That return consists of collecting contractual payments as well as gains and losses from the sale of financial assets. The investment strategy often results in sales activity that is significant in value. The Bank considers that under IFRS 9 these securities are held

within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.

- b. Equity investments held by the Bank have been designated under IFRS 9 as at FVOCI. Before the adoption of IFRS 9, these securities were measured at cost because their fair value was not considered to be reliably measurable. IFRS 9 has removed this cost exception.

c.

The following table reconciles the carrying amounts under IAS 39 to the carrying amounts under IFRS 9 on transition to IFRS 9 on 1 January 2018.

AMD'000	IAS 39 carrying amount 31 December 2017	Reclassification	Remeasurement	IFRS 9 carrying amount 1 January 2018
Financial assets				
<i>Amortised cost</i>				
Cash and cash equivalents:				
Opening balance	7,408,502	-	-	-
Remeasurement	-	-	(103)	-
Closing balance	-	-	-	7,408,399
Amounts receivable under reverse repurchase agreements:				
Opening balance	10,049,975	-	-	-
Remeasurement	-	-	-	-
Closing balance	-	-	-	10,049,975
Loans to banks:				
Opening balance	11,291,962	-	-	-
Remeasurement	-	-	(215)	-
Closing balance	-	-	-	11,291,747
Loans to customers:				
Opening balance	28,540,823	-	-	-
Remeasurement	-	-	231,000	-
Closing balance	-	-	-	28,771,823
Total amortised cost	57,291,262	-	230,682	57,521,944
<i>Available-for-sale</i>				
Investment securities:				
Opening balance	26,078,994	-	-	-
To FVOCI – debt	-	(26,065,834)	-	-
To FVOCI – equity	-	(13,160)	-	-
Closing balance	-	-	-	-
<i>FVOCI – debt</i>				
Investment securities:				
Opening balance	-	-	-	-
From available-for sale	-	26,065,834	-	-
Remeasurement	-	-	-	-
Closing balance at FV	-	-	-	26,065,834
<i>FVOCI – equity</i>				
Investment securities:				
Opening balance	-	-	-	-
From available-for sale	-	13,160	-	-
Closing balance	-	-	-	13,160
Total FVOCI	26,078,994	-	-	26,078,994

As a result of the adoption of IFRS 9 there were no reclassification and remeasurement of financial liabilities.

The following table analyses the impact, net of tax, of transition to IFRS 9 on reserves and accumulated losses. The impact relates to the fair value reserve and retained earnings. There is no impact on other components of equity.

AMD'000	Impact of adopting IFRS 9 at 1 January 2018
Fair value reserve – FVOCI debt (31 December 2017 – Fair value reserve – available-for-sale)	
Closing balance under IAS 39 (31 December 2017)	1,491,396
Recognition of expected credit losses under IFRS 9 for debt investment securities at FVOCI	103,041
Opening balance under IFRS 9 (1 January 2018)	1,594,437
Accumulated losses	
Closing balance under IAS 39 (31 December 2017)	(2,035,031)
Reversal of loans to customers previously written off as a result of changes in accounting policy*	227,427
Recognition of expected credit losses under IFRS 9 for loans to customers (including loan commitments)	(42,627)
Recognition of expected credit losses under IFRS 9 for investment securities	(103,041)
Recognition of expected credit losses under IFRS 9 for cash and cash equivalents and loans to banks	(254)
Opening balance under IFRS 9 (1 January 2018)	(1,953,526)

* The Bank reassessed its approach regarding the write off of loans to customers overdue 500-820 days. As a result the Bank reversed the previously written off loans to customers expensed in the amount of AMD 227,427 thousand.

The following table reconciles:

- the closing impairment allowance for financial assets in accordance with IAS 39 as at 31 December 2017; to
- the opening ECL allowance determined in accordance with IFRS 9 as at 1 January 2018.

For financial assets, this table is presented by the related financial assets' measurement categories in accordance with IAS 39 and IFRS 9, and shows separately the effect of the changes in the measurement category on the loss allowance at the date of initial application of IFRS 9, i.e. as at 1 January 2018.

AMD'000	Impairment allowance and provisions			1 January 2018 (IFRS 9)
	31 December 2017 (IAS 39/IAS 37)	Reclassification	Remeasurement	
Loans and receivables under IAS 39/financial assets at amortised cost under IFRS 9 (includes cash and cash equivalents, loans to banks, loans to customers and loan commitments)	4,366,887	-	53,601	4,420,488
Total measured at amortised cost	4,366,887	-	53,601	4,420,488
Available-for-sale debt investment securities under IAS 39/debt investment securities at FVOCI under IFRS 9	-	-	103,041	103,041
Total measured at FVOCI	-	-	103,041	103,041

5 Net interest income

8 Income taxes

	1 April 2019 30 June 2019 AMD'000	1 January 2019 30 June 2019 AMD'000	1 April 2018 30 June 2018 AMD'000	1 January 2018 30 June 2018 AMD'000
Current year tax expense	(108,706)	(295,538)	-	-
Origination and reversal of temporary differences	(27,072)	(16,569)	29,111	(76,042)
Total income tax (expense)/benefit	(135,778)	(312,107)	29,111	(76,042)

In 2019, the applicable tax rate for current and deferred tax is 20% (2018: 20%).

Reconciliation of effective tax rate for the periods ended 30 June 2018 and 30 June 2019:

	30 June 2019 AMD'000	%	30 June 2018 AMD'000	%
Profit before tax	1,476,389	100	668,121	100
Tax at the applicable tax rate	(295,278)	(20)	(133,624)	(20)
Non-deductible costs	(16,829)	(1)	(14,383)	(2.2)
Change in unrecognised deferred tax assets	-	-	71,965	10.8
	(312,107)	(21)	(76,042)	(11.4)

Deferred tax assets and liabilities

Temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes give rise to net deferred tax liabilities as at 30 June 2019 and as at 30 June 2018.

9 Cash and cash equivalents

	30 June 2019	31 December 2018
	AMD'000	AMD'000
Cash on hand	551,250	446,626
Nostro accounts with the CBA, including obligatory reserves	13,662,027	9,800,969
Nostro accounts with other banks		
- OECD banks	606,350	152,809
- Other foreign banks	1,073,412	796,378
- Largest 5 Armenian banks	15	15
- Other Armenian banks	1,281	1,290
Total nostro accounts with other banks	1,681,058	950,492
Total gross cash and cash equivalents	15,894,335	11,198,087
Credit loss allowance	(765)	(144)
Total net cash and cash equivalents	15,893,570	11,197,943

No cash and cash equivalents are past due.

As at 30 June 2019 the Bank has no bank except for CBA (2018: no bank except for the CBA) whose balances exceeded 10% of the equity.

Nostro accounts with the CBA

Nostro accounts with the CBA are related to settlement activity and are available for withdrawal at the end of the year.

Banks are required to maintain a cash deposit (obligatory reserve) with the CBA, equal to 2% of the amounts attracted in Armenian drams and 18% of the amounts attracted in foreign currency (2% in foreign currency, 16% in Armenian drams). The Bank's ability to withdraw such deposit is not restricted by the statutory legislation, however, if the Bank fails to comply with minimum average monthly amount of reserve for amounts attracted in Armenian drams and in foreign currency, the sanctions may apply.

As at 30 June 2019 included in nostro accounts with the CBA, is the amount of obligatory reserve equivalent to AMD 7,132,083 thousand for amounts attracted in Armenian drams and foreign currency (31 December 2018: AMD 6,531,917 thousand).

10 Amounts receivable under reverse repurchase agreements

	30 June 2019	31 December 2018
	AMD'000	AMD'000
Amounts receivable from 5 largest Armenian banks	2,705,635	1,403,892
Amounts receivable from other Armenian banks	3,203,731	4,241,605
	5,909,366	5,645,497

As at 30 June 2019 the Bank has one bank (31 December 2018: one), whose balances exceeded 10% of equity. The gross value of these balances as at 30 June 2019 is AMD 3,203,731 thousand (31 December 2018: AMD 3,239,786 thousand).

Amounts receivable under reverse repurchase agreements are from reputable Armenian banks. None of them are past due.

Collateral

As at 30 June 2019 the amounts receivable under reverse repurchase agreements were collateralized by government securities of the Republic of Armenia with the fair values of AMD 6,151,852 thousand (31 December 2018: AMD 5,904,003 thousand).

11 Loans to banks

	30 June 2019	31 December 2018
	AMD'000	AMD'000
Credit card settlement deposit with the CBA	70,000	150,000
Loans and deposits with other banks		
- Largest 5 Armenian banks	4,294,879	3,426,238
- Other Armenian banks	8,665,943	5,599,169
- OECD banks	77,441	78,020
Total loans and deposits with other banks	13,038,263	9,103,427
Total gross loans to banks	13,108,263	9,253,427
Credit loss allowance	(2,259)	(2,377)
Total net loans to banks	13,106,004	9,251,050

No amounts due from banks are past due.

As at 30 June 2019 included in loans and deposits with OECD banks is AMD 77,441 thousand (31 December 2018: AMD 78,020 thousand) which represents a blocked deposit in HSBC Bank Plc for membership in Europay International.

(a) Credit card settlement deposit with the CBA

The credit card settlement deposit with the CBA is a non-interest bearing deposit calculated in accordance with regulations issued by the CBA and whose withdrawability is restricted.

(b) Concentration of loans to banks

As at 30 June 2019 the Bank has one bank (31 December 2018: one), whose balances exceeded 10% of equity. The gross value of these balances as at 30 June 2019 is AMD 4,776,998 thousand (31 December 2018: AMD 4,844,754 thousand).

(b) Analysis of collateral

(i) Loans to corporate customers

Loans to corporate customers are subject to individual credit appraisal and impairment testing. The general creditworthiness of a corporate customer tends to be the most relevant indicator of credit quality of the loan extended to it. However, collateral provides additional security and the Bank generally requests corporate borrowers to provide it.

The following tables provides information on collateral and other credit enhancements securing loans to corporate customers, net of impairment, by types of collateral:

30 June 2019		Fair value of collateral: for collateral assessed as of loan reporting date	Fair value of collateral: for collateral assessed as of loan inception date
AMD'000	Loans to customers, carrying amount		
Loans without individual signs of impairment			
Cash and deposit	132,968	-	132,968
Real estate	11,580,968	-	11,580,968
Bank account turnover	-	-	-
Other	160,518	-	160,518
No collateral	1,878,702	-	-
Total loans without individual signs of impairment	13,753,156	-	11,874,454
Overdue or impaired loans			
Real estate	143,159	143,159	-
No collateral	75,012	-	-
Total overdue or impaired loans	218,171	143,159	-
Total loans to corporate customers	13,971,327	143,159	11,874,454

31 December 2018		Fair value of collateral: for collateral assessed as of loan reporting date	Fair value of collateral: for collateral assessed as of loan inception date
AMD'000	Loans to customers, carrying amount		
Loans without individual signs of impairment			
Cash and deposit	550,914	-	550,914
Real estate	10,484,416	-	10,484,416
Bank account turnover	4,998,550	-	4,998,550
Other	260,259	-	260,259
No collateral	4,981,735	-	-
Total loans without individual signs of impairment	21,275,874	-	16,294,139
Overdue or impaired loans			
Real estate	157,881	157,881	-
No collateral	83,226	-	-
Total overdue or impaired loans	241,107	157,881	-
Total loans to corporate customers	21,516,981	157,881	16,294,139

The tables above excludes overcollateralisation.

For loans secured by multiple types of collateral, collateral that is most relevant for impairment assessment is disclosed. Securities received from individuals, such as shareholders of SME borrowers, are not considered for impairment assessment purposes. Accordingly, such loans and unsecured portions of partially secured exposures are presented as loans without collateral or other credit enhancement.

The recoverability of loans which are neither past due nor impaired primarily depends on the creditworthiness of borrowers rather than the value of collateral, and the Bank does not necessarily update the valuation of collateral as at each reporting date.

(ii) Loans to retail customers

Mortgage loans and consumer loans secured by real estate are secured by the underlying housing real estate. The Bank's policy is to issue mortgage loans and consumer loans secured by real estate with a loan-to-value ratios of a maximum of 70% and 50% respectively at the date of loan issuance. Small business loans are secured by real estate. Auto loans are secured by the underlying cars. Consumer loans with salary domiciliation and credit card loans are secured by salaries.

(iii) Repossessed collateral

During the period ended 30 June 2019, the Bank obtained certain assets by taking possession of collateral for loans to customers with a net carrying amount of AMD 58,408 thousand (30 June 2018 AMD 119,212 thousand). Part of the repossessed collateral in the amount of AMD 140,746 thousand was sold during the period ended 30 June 2019 (30 June 2018: AMD 12,794 thousand).

As at 30 June 2019 and 31 December 2018, the repossessed collateral comprises:

	30 June 2019	31 December 2018
	AMD'000	AMD'000
Real estate	831,946	914,284
Other assets	-	-
Total repossessed collateral	831,946	914,284

The Bank's intention is to sell these assets as soon as it is practicable.

(c) Asset under lien

As at 30 June 2019, loans to customers with a gross value of AMD 1,784,125 thousand (31 December 2018: AMD 1,822,018 thousand) serve as collateral for deposits and balances from banks and other borrowed funds (see Notes 16 and 18).

(d) Industry and geographical analysis of the loan portfolio

Loans to customers were issued primarily to customers located within the Republic of Armenia who operate in the following economic sectors:

	30 June 2019	31 December 2018
	AMD'000	AMD'000
Processing of agricultural produce	3,710,570	3,248,365
Construction	3,401,306	2,745,786
Real estate	3,249,904	3,280,520
Trade	2,631,873	3,178,214
Transport and communication	1,500,245	1,590,179
Energy and gas	1,432,205	9,892,755
Manufacturing	953,322	1,203,091
Financial and other services	583,202	612,514
Loans to retail customers	13,860,947	13,395,365
	31,323,574	39,146,789
Credit loss allowance	(3,609,791)	(4,402,531)
	27,713,783	34,744,258

(e) Significant credit exposures

As at 30 June 2019 the Bank has one borrower or group of connected borrowers (31 December 2018: three), whose net loan balances exceed 10% of equity. The carrying value of these loans as at 30 June 2019 is AMD 3,387,932 thousand (31 December 2018: AMD 12,677,205 thousand).

(f) Loan maturities

The maturity of the loan portfolio is presented in Note 21 (d), which shows the remaining period from the reporting date to the contractual maturity of the loans.

13 Investment securities

	30 June 2019	31 December 2018
	AMD'000	AMD'000
Held by the Bank		
Debt and other fixed-income instruments		
- Government securities of the Republic of Armenia	30,677,560	29,129,486
- Securities of international financial institutions	897,516	897,925
- Corporate bonds issued by largest 5 Armenian bank	1,325,239	510,394
- Corporate bonds of other Armenian financial institutions	403,487	403,590
	33,303,802	30,941,395
Equity instruments		
- Corporate shares	13,160	13,160
	33,316,962	30,954,555
Credit loss allowance	(182,139)	(174,203)
Carrying amount – fair value	33,316,962	30,954,555

None of investment securities are past due.

(a) Non-quoted equity investment securities designated at FVOCI

At 1 January 2018, the Bank designated certain investments shown in the following table as equity securities as at FVOCI. In 2017, these investments were classified as available-for-sale and measured at cost. The FVOCI designation was made because the investments are expected to be held for the long-term.

Name	Country of incorporation	Main activity	% Controlled		30 June 2019 AMD'000	31 December 2018 AMD'000
			30 June 2019 AMD'000	December 2018 AMD'000		
ArCa	Republic of Armenia	Payment system	1.25%	1.25%	12,143	12,143
SWIFT	Belgium	Money transfer	0%	0%	1,017	1,017
					13,160	13,160

None of these investments was disposed of, no dividend income recognized during the period ended 30 June 2019 and there were no transfers of any cumulative gain or loss within equity relating to these investments.

The management believes that estimated fair values of these instruments approximates to their costs as at 30 June 2019 and 31 December 2018.

14 Property, equipment and intangible assets

Carrying amount At 31 December 2018	1,182,342	45,215	40,985	19,950	68,768	1,357,260

There are no capitalised borrowing costs related to the acquisition or construction of property and equipment during the three months ended 30 June 2019 (2018: nil).

15 Other assets

	30 June 2019	31 December 2018
	AMD'000	AMD'000
Receivables under money transfer and clearing systems	4,417	3,882
Other receivables	5,080	49,929
Total other financial assets	9,497	53,811
Tax prepayments	275,697	70,344
Other prepayments	71,496	61,116
Other	22,561	23,305
Total other non-financial assets	369,754	154,765
Total other assets	379,251	208,576

During the period ended 30 June 2019 receivables in the amount of AMD 6,876 thousand were impaired and written off (2018: net write-off of AMD 2,809 thousand).

16 Deposits and balances from banks

	30 June 2019	31 December 2018
	AMD'000	AMD'000
Loans and term deposits	751,510	1,044,673
Short-term liabilities	33	-
	751,543	1,044,673

As at 30 June 2019 the Bank has no bank, whose balance exceeded 10% of equity (2018: none).

17 Current accounts and deposits from customers

	30 June 2019	31 December 2018
	AMD'000	AMD'000
Current accounts and demand deposits		
- Retail	8,041,070	6,206,381
- Corporate	1,431,512	867,040
Term deposits		
- Retail	33,942,984	32,521,336
- Corporate	13,718,772	14,028,499
	57,134,338	53,623,256

As at 30 June 2019 the Bank maintained customer deposit balances of AMD 402,393 thousand that serve as collateral for loans and credit related commitments granted by the Bank (31 December 2018: AMD 1,274,342 thousand).

As at 30 June 2019 the Bank has one customer (2018: one), whose balances exceeded 10% of equity. The gross value of these balances as at 30 June 2019 is AMD 4,105,919 thousand (2018: AMD 3,996,619 thousand).

18 Other borrowed funds

	30 June 2019	31 December 2018
	AMD'000	AMD'000
Loan from a related party	3,022,353	3,064,295
Loans from National Mortgage Company	747,301	876,632
Loan from International Financial Corporation (IFC)	-	188,415
Other	68,627	59,350
	3,838,281	4,188,692

(a) Convertible borrowing

On 19 January 2017 the Bank received a loan from the related party of USD 6,200 thousand convertible into the ordinary shares of the Bank at the nominal value per share within 4 years. The loan contains mandatory conversion clause, representing forward financial instrument. Management believes that the fair value of this instrument is not material as at 30 June 2019 and 31 December 2018.

(b) Breach of covenants

As at 31 December 2018 the Bank breached some of its maximum covenant thresholds under the loan agreement with IFC. As at 31 December 2018 the management did not obtain a waiver, so that these loans were payable on demand as at 31 December 2018. Accordingly, the loans from IFC of AMD 188,415 thousand are classified as being due on demand in the interest rate gap, liquidity and maturity tables in Note 21. As at 30 June 2019 loan from IFC was fully repaid.

19 Subordinated loans from Parent

On 30 April 2015, on 30 September 2016 and on 13 December 2016 the Bank obtained subordinated loans from the Parent of USD 5,000 thousand, EUR 9,375 thousand and USD 5,200 thousand convertible into the ordinary shares of the Bank at the nominal value per share within 10 years, at the option of the holder. The loans contain mandatory, voluntary and accelerated conversion options, representing forward and option financial instruments, respectively.

Management believes that the fair value of these instruments is not material as at 30 June 2019 and 31 December 2018.

20 Share capital and reserves

(a) Issued capital and share premium

The authorized, issued and outstanding share capital comprises 262,491 ordinary shares. All shares have a nominal value of AMD 100,000.

During the year ended 31 December 2018 the Bank issued 24,240 ordinary shares through conversion of subordinated loan in nominal value resulting in an increase in share capital by AMD 2,424,000 thousand (see Note 19).

The holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at annual and general meetings of the Bank.

(b) Nature and purpose of reserves

Fair value reserve for investment securities

Fair value reserve for investment securities comprises the cumulative net change in the fair value, until the assets are derecognized or impaired.

(c) Dividends

Dividends payable are restricted to the maximum retained earnings of the Bank, which are determined according to legislation of the Republic of Armenia. In accordance with the legislation of the Republic of Armenia, as at the reporting date no reserves are available for distribution (2018: nil).

21 Risk management

(a) Risk management policies and procedures

Management of risk is fundamental to the business of banking and forms an essential element of the Bank's operations. The major (significant) risks faced by the Bank are those related to financial risk, market risk, credit risk, liquidity risk, and operational.

The Bank's risk management policies aim to identify, analyze and manage the risks faced by the Bank, to set appropriate risk limits and controls, and to continuously monitor risk levels and adherence to limits. Risk management policies and procedures are reviewed regularly to reflect changes in market conditions, products and services offered and emerging best practice. The Bank has developed a system of reporting on significant risks and capital.

The Board of Directors has overall responsibility for the oversight of the risk management framework, overseeing the management of key risks and reviewing its risk management policies and procedures as well as approving significantly large exposures. The Management Committee with the support of the Assets and Liability Committee (ALCO Committee) is responsible for monitoring and implementation of risk mitigation measures and making sure that the Bank operates within the established risk parameters.

Both external and internal risk factors are identified and managed throughout the organisation. Particular attention is given to identifying the full range of risk factors and determining the level of assurance over current risk mitigation procedures. Apart from the standard credit and market risk analysis, the Management Committee monitors financial and non-financial risks by holding regular meetings with operational units in order to obtain expert judgments in their respective areas of expertise.

In compliance with the Bank's internal documentation the the Management Committee and internal audit function frequently prepare reports, which cover the Bank's significant risks management. The reports include observations as to assessment of the effectiveness of the Bank's procedures and methodologies, and recommendations for improvement.

(b) Financial risk review

This note presents information about the Bank's exposure to financial risks.

Credit risk

Credit risk is the risk of financial loss to the Bank if a customer or counterparty to a financial

instrument fails to meet its contractual obligations. The Bank has policies and procedures for the management of credit exposures (both for recognized financial assets and unrecognized contractual commitments).

Corporate loan credit applications are originated and analyzed by the relevant relationship managers from the Commercial Banking Department, which is responsible for the corporate loan portfolio. Analysis reports are based on a structured analysis focusing on the customer's business and financial performance. The loan credit application and the report are then independently reviewed by the Risk Management Department and a second opinion is given accompanied by verification that credit policy requirements are met. The Management Committee reviews the loan credit application on the basis of submissions by the Commercial Banking Department. Individual transactions are also reviewed by the Legal Unit, depending on the specific risks and pending final approval of the Management Committee.

The Bank continuously monitors the performance of individual credit exposures and regularly reassesses the creditworthiness of its customers. The review is based on the customer's most recent financial statements and other information submitted by the borrower, or otherwise obtained by the Bank. The current market value of collateral is regularly assessed by independent appraisal companies or the Bank's specialists.

Retail loan credit applications are reviewed by the Retail Approval Unit, Retail Approval Committee and Management Committee based on the authorized limits. Apart from individual customer analysis, the whole credit portfolio is assessed by the Risk Management Department with regard to credit concentration and market risks.

Credit risk - Amounts arising from ECL

Inputs, assumptions and techniques used for estimating impairment

See accounting policy in Note 3(e)(iv).

Significant increase in credit risk

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Bank considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Bank's historical experience and expert credit assessment and including forward-looking information.

The objective of the assessment is to identify whether a significant increase in credit risk has occurred for an exposure by comparing:

- the remaining lifetime probability of default (PD) as at the reporting date; with
- the remaining lifetime PD for this point in time that was estimated at the time of initial recognition of the exposure (adjusted where relevant for changes in prepayment expectations).

The Bank uses three criteria for determining whether there has been a significant increase in credit risk:

- quantitative test based on movement in probability of default (PD);
- qualitative indicators; and
- backstop of 30 days past due.

Credit risk grades

The Bank allocates each exposure to a credit risk grade based on a variety of data that is determined to be predictive of the risk of default and applying experienced credit judgement. Credit risk grades are defined using qualitative and quantitative factors that are indicative of risk of default. These factors vary depending on the nature of the exposure and the type of borrower.

Credit risk grades are defined and calibrated such that the risk of default occurring increases exponentially as the credit risk deteriorates so, for example, the difference in risk of default between credit risk grades 1 and 2 is smaller than the difference between credit risk grades 2 and 3.

Each exposure is allocated to a credit risk grade at initial recognition based on available information about the borrower. Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade. The monitoring typically involves use of the following data.

Corporate exposure

All exposures (corporate and retail exposures)

- | | |
|---|--|
| <ul style="list-style-type: none"> • Information obtained during periodic review of customer files – e.g. audited financial statements, management accounts, budgets and projections. Examples of areas of particular focus are: gross profit margins, financial leverage ratios, debt service coverage, compliance with covenants, quality of management, senior management changes • Data from credit reference agencies, press articles, changes in external credit ratings • Quoted bond and credit default swap (CDS) prices for the borrower where available • Actual and expected significant changes in the political, regulatory and technological environment of the borrower or in its business activities | <ul style="list-style-type: none"> • Payment record – this includes overdue status as well as a range of variables about payment ratios • Utilisation of the granted limit • Requests for and granting of forbearance • Existing and forecast changes in business, financial and economic conditions |
|---|--|

Generating the term structure of PD

Credit risk grades are a primary input into the determination of the term structure of PD for corporate exposures. The Bank collects performance and default information about its credit risk exposures analysed by type of product and borrower as well as by credit risk grading. For some portfolios, information purchased from external credit reference agencies is also used. The Bank sets the maximum level of PDs equal to PD of the country’s rating grade where the borrower operates.

Overdue days are primary input into the determination of the term structure of PD for retail exposures in Markov’s model of migration matrices. Migration matrices are constructed using historical data over the past 48 months.

Determining whether credit risk has increased significantly

The Bank assesses whether credit risk has increased significantly since initial recognition at each reporting period. Determining whether an increase in credit risk is significant depends on the

characteristics of the financial instrument and the borrower, and the geographical region. What is considered significant will differ for different types of lending, in particular between corporate and retail.

The credit risk may also be deemed to have increased significantly since initial recognition based on qualitative factors linked to the Bank's credit risk management processes that may not otherwise be fully reflected in its quantitative analysis on a timely basis. This will be the case for exposures that meet certain heightened risk criteria, such as placement on a watch list. Such qualitative factors are based on its expert judgement and relevant historical experience.

As a backstop, the Bank considers that a significant increase in credit risk occurs no later than when an asset is more than 30 days past due or. Days past due are determined by counting the number of days since the earliest elapsed due date in respect of which full payment has not been received. Due dates are determined without considering any grace period that might be available to the borrower.

If there is evidence that there is no longer a significant increase in credit risk relative to initial recognition, then the loss allowance on an instrument returns to being measured as 12-month ECL. Some qualitative indicators of an increase in credit risk, such as delinquency of forbearance, may be indicative of an increased risk of default that persists after the indicator itself has ceased to exist. In these cases the Bank determines a probation period during which the financial asset is required to demonstrate good behaviour to provide evidence that its credit risk has declined sufficiently. When contractual terms of a loan have been modified, evidence that the criteria for recognising lifetime ECL are no longer met includes history of up-to-date payment performance against the modified contractual terms.

Definition of default

The Bank considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Bank in full, without recourse by the Bank to actions such as realising security (if any is held);
- the borrower is past due more than 90 days on any material credit obligation to the Bank. Overdrafts are considered as being past due once the customer has breached an advised limit or been advised of a limit smaller than the current amount outstanding; or
- it is becoming probable that the borrower will restructure the asset as a result of bankruptcy due to the borrower's inability to pay its credit obligations.

In assessing whether a borrower is in default, the Bank considers indicators that are:

- qualitative – e.g. breaches of covenant;
- quantitative – e.g. overdue status and non-payment on another obligation of the same issuer to the Bank; and
- based on data developed internally and obtained from external sources.

Inputs into the assessment of whether a financial instrument is in default and their significance may vary over time to reflect changes in circumstances.

Incorporation of forward-looking information

The Bank incorporates forward-looking information into both the assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and the measurement of ECL. The Bank uses expert judgment in assessment of forward-looking information.

The Bank has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variable and credit risk and credit losses. This key driver is GDP forecasts, changes in exchange rates and prices in real estate market.

Modified financial assets

The contractual terms of a loan may be modified for a number of reasons, including changing market conditions, customer retention and other factors not related to a current or potential credit deterioration of the customer. An existing loan whose terms have been modified may be derecognised and the renegotiated loan recognised as a new loan at fair value in accordance with the accounting policy set out in Note 3(e)(iii).

When the terms of a financial asset are modified and the modification does not result in derecognition, the determination of whether the asset's credit risk has increased significantly reflects comparison of:

- its remaining lifetime PD at the reporting date based on the modified terms; with
- the remaining lifetime PD estimated based on data at initial recognition and the original contractual terms.

When modification results in derecognition, a new loan is recognised and allocated to Stage 1 (assuming it is not credit-impaired at that time).

The Bank renegotiates loans to customers in financial difficulties (referred to as 'forbearance activities') to maximise collection opportunities and minimise the risk of default. Under the Bank's forbearance policy, loan forbearance is granted on a selective basis if the debtor is currently in default on its debt or if there is a high risk of default, there is evidence that the debtor made all reasonable efforts to pay under the original contractual terms and the debtor is expected to be able to meet the revised terms.

The revised terms usually include extending the maturity, changing the timing of interest payments and amending the terms of loan covenants. Both retail and corporate loans are subject to the forbearance policy.

For financial assets modified as part of the Bank's forbearance policy, the estimate of PD reflects whether the modification has improved or restored the Bank's ability to collect interest and principal and the Bank's previous experience of similar forbearance action. As part of this process, the Bank evaluates the borrower's payment performance against the modified contractual terms and considers various behavioural indicators.

Generally, forbearance is a qualitative indicator of a significant increase in credit risk and an expectation of forbearance may constitute evidence that an exposure is credit-impaired (see Note 3(e)(iv)). A customer needs to demonstrate consistently good payment behavior over a period of time before the exposure is no longer considered to be credit-impaired/ in default or the PD is considered to have decreased such that the loss allowance reverts to being measured at an amount equal to 12-month ECL.

Measurement of ECL

The key inputs into the measurement of ECL are the term structure of the following variables:

- probability of default (PD);

- loss given default (LGD);
- exposure at default (EAD).

ECL for exposures in Stage 1 is calculated by multiplying the 12-month PD by LGD and EAD. Lifetime ECL is calculated by multiplying the lifetime PD by LGD and EAD.

The methodology of estimating PDs is discussed above under the heading “Generating the term structure of PD”.

The Bank estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties. The LGD models consider the structure, collateral, seniority of the claim, counterparty industry and recovery costs of any collateral that is integral to the financial asset. For loans secured by retail property, LTV ratios are a key parameter in determining LGD. LGD estimates are recalibrated for different economic scenarios and, for real estate lending, to reflect possible changes in property prices. They are calculated on a discounted cash flow basis using the effective interest rate as the discounting factor.

EAD represents the expected exposure in the event of a default. The Bank derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract and arising from amortisation. The EAD of a financial asset is its gross carrying amount at the time of default. For lending commitments, the EAD is potential future amounts that may be drawn under the contract, which are estimated based on historical observations and forward-looking forecasts. For financial guarantees, the EAD represents the guarantee exposure when the financial guarantee becomes payable.

As described above, and subject to using a maximum of a 12-month PD for Stage 1 financial assets, the Bank measures ECL considering the risk of default over the maximum contractual period (including any borrower’s extension options) over which it is exposed to credit risk, even if, for credit risk management purposes, the Bank considers a longer period. The maximum contractual period extends to the date at which the Bank has the right to require repayment of an advance or terminate a loan commitment or guarantee.

Where modelling of a parameter is carried out on a collective basis, the financial instruments are grouped on the basis of shared risk characteristics that include:

- instrument type;
- collateral type.

The groupings are subject to regular review to ensure that exposures within a particular group remain appropriately homogeneous.

For portfolios in respect of which the Bank has limited historical data, external benchmark information is used to supplement the internally available data. The portfolios for which external benchmark information represents a significant input into measurement of ECL are as follows.

	Exposure	External benchmarks used	
		PD	LGD
Debt investment securities at FVOCI	33,303,802	S&P default study	Moody’s recovery studies
Loans to corporate customers	1,631,854	S&P default study	Moody’s recovery studies
Loans to corporate customers	12,339,473	S&P default study	-

Loss allowance

The following tables show reconciliations from the opening to the closing balances of the loss allowance by class of financial instruments.

The above loss allowance is not recognised in the statement of financial position because the carrying amount of debt investment securities at FVOCI is their fair value.

The following table provides a reconciliation between:

- amounts shown in the above tables reconciling opening and closing balances of loss allowance per class of financial instrument; and
- the ‘impairment losses on debt financial assets’ and ‘impairment losses on loan commitments and financial guarantees’ line items in the statement of profit or loss and other comprehensive income.

AMD'000	Cash and cash equivalents	Loans to banks at amortised cost	Loans to customers at amortised cost - corporate customers	Loans to customers at amortised cost - retail customers	Debt investment securities at FVOCI	Other assets	Total

Credit quality analysis

The following table sets out information about the credit quality of financial assets measured at amortised cost, FVOCI debt instruments as at 30 June 2019 and 31 December 2018. Unless specially indicated, for financial assets, the amounts in the table represent gross carrying amounts. For loan commitments and financial guarantee contracts, the amounts in the table represent the amounts committed or guaranteed, respectively.

Explanation of the terms: Stage 1, Stage 2, Stage 3 are included in Note 3(e)(iv).

Collateral held and other credit enhancements

At 30 June 2019 and 31 December 2018, the Bank had the financial instruments for which no loss allowance is recognised because of collateral.

	Exposure as at 30 June 2019	Exposure as at 31 December 2018
Amounts receivable under reverse repurchase agreements	5,909,366	5,645,497
Loans to corporate customers	2,573,544	2,125,198
Loans to retail customers	76,116	260,571

During the period, there was no change in the Bank's collateral policies.

Concentrations of credit risk

The maximum exposure to credit risk is generally reflected in the carrying amounts of financial assets in the statement of financial position and unrecognized contractual commitment amounts. The impact of possible netting of assets and liabilities to reduce potential credit exposure is not significant.

The maximum exposure to credit risk from financial assets at the reporting date is as follows:

	30 June 2019	31 December 2018
	AMD'000	AMD'000
Assets		
Cash and cash equivalents	15,342,320	10,751,317
Amounts receivable under reverse repurchase agreements	5,909,366	5,645,497
Loans to banks	13,106,004	9,251,050
Loans to customers	27,713,783	34,744,258
Investment securities	33,316,962	30,954,555
Other financial assets	9,497	53,811
Total maximum exposure	95,397,932	91,400,488

Collateral generally is not held against investments in securities, and loans to banks, except when securities are held as part of reverse repurchase activities.

For the analysis of collateral held against loans to customers and concentration of credit risk in respect of loans to customers refer to Note 12.

The maximum exposure to credit risk from unrecognized contractual commitments at the reporting date is presented in Note 22.

As at 30 June 2019 the Bank has two debtors or groups of connected debtors (as at 31 December 2018: two), credit risk exposure to whom exceeded 10 percent maximum credit risk exposure. The credit risk exposure for these counterparties as at 30 June 2019 is AMD 44,339,486 thousand (as at 31 December 2018: AMD 39,080,414 thousand).

Offsetting financial assets and financial liabilities

The disclosures set out in the tables below include financial assets and financial liabilities that:

- are offset in the Bank's statement of financial position or
- are subject to an enforceable master netting arrangement or similar agreement that covers similar financial instruments, irrespective of whether they are offset in the statement of financial position.

The similar agreements include derivative clearing agreements, global master repurchase agreements, and global master securities lending agreements. Financial instruments such as loans and deposits are not disclosed in the table below unless they are offset in the statement of financial position.

The Bank receives and accepts collateral in the form of marketable securities in respect of sale and repurchase, and reverse sale and repurchase agreements.

Such collateral is subject to the standard industry terms. This means that securities received/given as collateral can be pledged or sold during the term of the transaction but must be returned on maturity of the transaction. The terms also give each counterparty the right to terminate the related transactions upon the counterparty's failure to post collateral.

The above arrangements do not meet the criteria for offsetting in the statement of financial position. This is because they create a right of set-off of recognized amounts that is enforceable only following an event of default, insolvency or bankruptcy of the Bank or the counterparties. In addition the Bank and its counterparties do not intend to settle on a net basis or to realize the assets and settle the liabilities simultaneously.

The table below shows financial assets and financial liabilities subject to offsetting, enforceable master netting arrangements and similar arrangements as at 30 June 2019:

AMD'000

Types of financial assets	Gross amounts of recognized financial assets	Gross amount of recognized financial liability offset in the statement of financial position	Net amount of financial assets presented in the statement of financial position	Related amounts subject to offsetting in case of bankruptcy Financial instruments	Net amount
Amounts receivable under reverse repurchase agreements	5,909,366	-	5,909,366	5,909,366	-
Total financial assets	5,909,366	-	5,909,366	5,909,366	-

The table below shows financial assets and financial liabilities subject to offsetting, enforceable master netting arrangements and similar arrangements as at 31 December 2018:

AMD'000

Types of financial assets	Gross amounts of recognized financial assets	Gross amount of recognized financial liability offset in the statement of financial position	Net amount of financial assets presented in the statement of financial position	Related amounts subject to offsetting in case of bankruptcy Financial instruments	Net amount
Amounts receivable under reverse repurchase agreements	5,645,497	-	5,645,497	5,645,497	-
Total financial assets	5,645,497	-	5,645,497	5,645,497	-

(b) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises currency risk, interest rate risk and other price risks. Market risk arises from open positions in debt and equity financial instruments, which are exposed to general and specific market movements and changes in the level of volatility of market prices and foreign currency rates. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, whilst optimizing the return on risk.

Overall authority for market risk management is vested in the ALCO Committee. Market risk limits are approved by the ALCO Committee.

The Bank manages its market risk by setting open position limits in relation to financial instrument, interest rate maturity and currency positions and stop-loss limits. These are monitored on a regular basis and reviewed and approved by the ALCO Committee.

(i) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Bank is exposed to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. Interest margins may increase as a result of such changes but may also reduce or create losses in the event that unexpected movements occur.

Interest rate gap analysis

Interest rate risk is managed principally through monitoring interest rate gaps. A summary of the interest gap position for major financial instruments is as follows:

AMD'000	<u>Less than 3 months</u>	<u>3-6 months</u>	<u>6-12 months</u>	<u>1-5 years</u>	<u>More than 5 years</u>	<u>Non-interest bearing</u>	<u>Carrying amount</u>

Average effective interest rates

The table below displays average effective interest rates for interest bearing assets and liabilities as at 30 June 2019 and 31 December 2018. These interest rates are an approximation of the yields to maturity of these assets and liabilities.

	30 June 2019			31 December 2018		
	Average effective interest rate, %			Average effective interest rate, %		
	AMD	USD	Other currencies	AMD	USD	Other currencies
Interest bearing assets						
Amounts receivable under reverse repurchase agreements	5.8%	2.3%	-	6.2%	2.0%	-
Loans to banks	-	3.9%	1.0%	6.8%	5.6%	-
Loans to customers	12.8%	8.3%	7.4%	12.9%	8.0%	7.1%
Investment securities	9.8%	6.4%	-	10.7%	6.5%	-
Interest bearing liabilities						
Deposits and balances from banks	8.0%	-	-	8.0%	-	-
Current accounts and deposits from customers						
- Current accounts and demand deposits	2.1%	1.0%	0.2%	2.4%	1.1%	0.3%
- Term deposits	9.6%	4.3%	2.5%	9.5%	4.5%	2.6%
Other borrowed funds	8.9%	8.3%	-	9.0%	8.2%	-
Subordinated loans from parent	-	6.5%	6.5%	-	6.5%	6.5%

Interest rate sensitivity analysis

The management of interest rate risk based on interest rate gap analysis is supplemented by monitoring the sensitivity of financial assets and liabilities. An analysis of sensitivity of net profit or loss and equity (net of taxes) to changes in interest rates (repricing risk) based on a simplified scenario of a 100 basis point (bp) symmetrical fall or rise in all yield curves and positions of interest-bearing assets and liabilities existing as at 30 June 2019 and 31 December 2018, respectively, as follows:

	30 June 2019	31 December 2018
	AMD'000	AMD'000
100 bp parallel fall	10,690	26,883
100 bp parallel rise	(10,690)	(26,883)

An analysis of sensitivity of net profit or loss and equity as a result of changes in fair value of financial assets at FVOCI due to changes in the interest rates based on positions existing at 30 June 2019 and 31 December 2018 and a simplified scenario of a 100 bp symmetrical fall or rise in all yield curves, respectively, is as follows:

	30 June 2019		31 December 2018	
	Net profit or loss	Equity	Net profit or loss	Equity
	AMD'000	AMD'000	AMD'000	AMD'000
100 bp parallel fall	-	1,187,030	-	1,117,510
100 bp parallel rise	-	(1,187,030)	-	(1,117,510)

(ii) Currency risk

The Bank has assets and liabilities denominated in several foreign currencies.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign currency exchange rates. The Bank does not hedge its exposure to currency risk.

The following table shows the foreign currency exposure structure of financial assets and liabilities as at 30 June 2019:

	AMD AMD'000	USD AMD'000	EUR AMD'000	Other currencies AMD'000	Total AMD'000
ASSETS					
Cash and cash equivalents	7,093,490	2,757,106	5,967,297	75,677	15,893,570
Amounts receivable under reverse repurchase agreements	5,718,240	191,126	-	-	5,909,366
Loans to banks	70,000	12,492,770	543,234	-	13,106,004
Loans to customers	8,110,163	19,510,213	93,407	-	27,713,783

Other borrowed funds	815,928	3,022,353	-	-	3,838,281
Subordinated loans from Parent	-	2,522,947	5,179,024	-	7,701,971
Other financial liabilities	177,591	958	180	-	178,729
Total liabilities	23,941,876	38,991,297	6,625,673	46,016	69,604,862
Net position	28,876,291	(2,539,934)	(21,702)	29,665	26,344,320

The following table shows the foreign currency exposure structure of financial assets and liabilities as at 31 December 2018:

	AMD AMD'000	USD AMD'000	EUR AMD'000	Other currencies AMD'000	Total AMD'000
ASSETS					
Cash and cash equivalents	7,421,380	2,387,381	1,374,525	14,657	11,197,943
Amounts receivable under reverse repurchase agreements	5,330,791	314,706	-	-	5,645,497
Loans to banks	1,910,552	7,340,498	-	-	9,251,050
Loans to customers	8,166,600	21,451,286	5,126,372	-	34,744,258
Investment securities	29,467,185	1,487,370	-	-	30,954,555
Other financial assets	42,574	11,201	33	3	53,811
Total assets	52,339,082	32,992,442	6,500,930	14,660	91,847,114
LIABILITIES					
Deposits and balances from banks	1,044,673	-	-	-	1,044,673
Current accounts and deposits from customers	21,937,680	30,410,137	1,272,803	2,636	53,623,256
Other borrowed funds	935,982	3,252,710	-	-	4,188,692
Subordinated loans from Parent	-	2,558,058	5,278,779	-	7,836,837
Other financial liabilities	154,545	320	11,981	-	166,846
Total liabilities	24,072,880	36,221,225	6,563,563	2,636	66,860,304
Net position	28,266,202	(3,228,783)	(62,633)	12,024	24,986,810

A weakening of the AMD, as indicated below, against the following currencies at 30 June 2019 and 31 December 2018 would have increased (decreased) equity and profit or loss by the amounts

shown below. This analysis is based on foreign currency exchange rate variances that the Bank considered to be reasonably possible at the end of the reporting period. The analysis assumes that all other variables, in particular interest rates, remain constant.

	30 June 2019	31 December 2018
	AMD'000	AMD'000
10% appreciation of USD against AMD	(253,993)	(322,878)
10% appreciation of EUR against AMD	(2,171)	(6,263)

A strengthening of the AMD against the above currencies at 30 June 2019 and 31 December 2018 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

(d) Liquidity risk

Liquidity risk is the risk that the Bank will encounter difficulty meeting obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk exists when the maturities of assets and liabilities do not match. The matching and/or controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to liquidity management. It is unusual for financial institutions ever to be completely matched since business transacted is often of an uncertain term and of different types. An unmatched position potentially enhances profitability, but can also increase the risk of losses.

The Bank maintains liquidity management with the objective of ensuring that funds will be available at all times to honor all cash flow obligations as they become due. The liquidity policy is reviewed and approved by the ALCO Committee.

The Bank seeks to actively support a diversified and stable funding base comprising long-term and short-term loans from other banks, core corporate and retail customer deposits, accompanied by diversified portfolios of highly liquid assets, in order to be able to respond quickly and smoothly to unforeseen liquidity requirements.

The liquidity management policy requires:

- projecting cash flows by major currencies and considering the level of liquid assets necessary in relation thereto;
- maintaining a diverse range of funding sources;
- managing the concentration and profile of debts;
- maintaining a portfolio of highly marketable assets that can easily be liquidated as protection against any interruption to cash flow;
- maintaining liquidity and funding contingency plans;
- monitoring liquidity ratios against regulatory requirements.

The Treasury Unit receives information from business units regarding the liquidity profile of their financial assets and liabilities and details of other projected cash flows arising from projected future business. The Treasury Unit then provides for an adequate portfolio of short-term liquid assets to be maintained, largely made up of short-term liquid trading securities, loans to banks and other inter-bank facilities, to ensure that sufficient liquidity is maintained within the Bank as a whole.

The daily liquidity position is monitored and regular liquidity stress testing under a variety of scenarios covering both normal and more severe market conditions is performed by the Treasury Unit. Under the normal market conditions, liquidity reports covering the liquidity position of the Bank are presented to senior management on a weekly basis. Decisions on the liquidity management are made by the ALCO Committee, based on the reports of Risk Management and Treasury Unit.

The following tables show the undiscounted cash flows on financial liabilities and credit-related commitments on the basis of their earliest possible contractual maturity. The total gross outflow disclosed in the tables is the contractual, undiscounted cash flow on the financial liability or credit related commitment. For issued financial guarantee contracts, the maximum amount of the guarantee is allocated to the earliest period in which the guarantee can be called.

The contractual maturity analysis for financial liabilities as at 30 June 2019 is as follows:

AMD'000	Demand and less than 1 month	From 1 to 3 months	From 3 to 6 months	From 6 to 12 months	More than 1 year	Total gross amount outflow	Carrying amount
30 June 2019							
Non-derivative liabilities							
Deposits and balances from banks	150,682	-	29,497	29,702	747,527	957,408	751,543

Total	13,465,650	3,888,488	10,701,261	20,924,916	24,929,264	73,909,579	66,860,304
Credit related commitments	3,353,319	-	-	-	-	3,353,319	3,353,319

In accordance with Armenian legislation, individuals can withdraw their term deposits at any time, forfeiting in most of the cases the accrued interest. These deposits are classified in accordance with their contractual maturity dates. The classification of these deposits in accordance with their stated maturity dates is presented below:

	30 June 2019	31 December 2018
	AMD'000	AMD'000
Less than 1 month	2,473,531	2,519,528
From 1 to 3 months	8,386,821	3,011,273
From 3 to 12 months	14,769,136	22,462,821
More than 1 year	7,585,598	3,856,139
	33,215,086	31,849,761

The table below shows an analysis, by contractual maturities, of the amounts recognized in the statement of financial position as at 30 June 2019:

	Demand and less than 1 month	From 1 to 3 months	From 3 to 12 months	From 1 to 5 years	More than 5 years	No maturity	Overdue	Total
Assets								
Cash and cash equivalents	15,893,570	-	-	-	-	-	-	15,893,570

The key measure used by the Bank for managing liquidity risk is the ratio of highly liquid assets to demand liabilities. For this purpose highly liquid assets include cash, nostro accounts, gold bullion, debt securities issued by the Government of Armenia, CBA and other corporate debt securities for which there is an active and liquid market, which are not pledged or the use of which is not restricted in any way. Demand liabilities include current accounts and demand deposits of customers, as well as any other liability that is payable on demand. The reported unaudited ratios of highly liquid assets to demand liabilities at the 30 June 2019 is 390.87 (31 December 2018: 407.2%).

The above ratio is also used to measure compliance with the liquidity limit established by the CBA (60% minimum).

(e) Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Bank's processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks, such as those arising from legal and regulatory requirements and generally accepted standards of corporate behavior. Operational risks arise from all of the Bank's operations.

The Bank's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Bank's reputation with overall cost effectiveness and innovation. In all cases, the Bank policy requires compliance with all applicable legal and regulatory requirements.

The Bank manages operational risk by establishing internal controls that management determines to be necessary in each area of its operations.

22 Capital management

The CBA sets and monitors capital requirements for the Bank.

The Bank defines as capital those items defined by statutory regulation as capital for credit institutions. Under the current capital requirements set by the CBA, which are based on Basel Accord principles, banks have to maintain a ratio of capital to risk weighted assets (statutory capital ratio) above the prescribed minimum level. As at 30 June 2019, this minimum level is 12% (2018: 12%). The Bank is in compliance with the statutory capital ratio as at 30 June 2019 and 31 December 2018.

The following table shows the composition of the capital position calculated in accordance with the requirements of the CBA, as at 30 June 2019 and 31 December 2018:

	30 June 2019	31 December 2018
	AMD'000	AMD'000
Tier 1 capital		
Share capital	26,249,100	26,249,100
Share premium	257,149	257,149
General reserve	51,292	51,292
Retained earnings/(accumulated losses)	1,032,958	3,444
Deductions	(1,516,501)	(1,071,769)
Total tier 1 capital	26,073,998	25,489,216
Tier 2 capital		
Fair value reserve for investment securities	1,283,278	1,185,174
Subordinated loans	7,549,851	7,705,969
Deduction of tier 2 capital as per CBA regulations	(1,010,930)	-
Total tier 2 capital	7,822,199	8,891,143
Total capital	33,896,197	34,380,359
Total risk weighted assets	82,198,761	84,639,770
Total capital expressed as a percentage of risk-weighted assets (total capital ratio)	41.2%	40.6%
Total tier 1 capital expressed as a percentage of risk-weighted assets (tier 1 capital ratio)	31.7%	30.1%

The risk-weighted assets are measured by means of a hierarchy of risk weights classified according to the nature and reflecting an estimate of credit, market and other risks associated with each asset

and counterparty, taking into account any eligible collateral or guarantees. A similar treatment is adopted for unrecognized contractual commitments, with some adjustments to reflect the more contingent nature of the potential losses.

23 Credit related commitments

The Bank has outstanding credit related commitments to extend loans. These credit related commitments take the form of approved loans and credit card limits and overdraft facilities.

The Bank provides financial guarantees and letters of credit to guarantee the performance of customers to third parties. These agreements have fixed limits and generally extend for a period of up to one year.

The Bank applies the same credit risk management policies and procedures when granting credit commitments, financial guarantees and letters of credit as it does for granting loans to customers.

The contractual amounts of credit related commitments are set out in the following table by category. The amounts reflected in the table for credit related commitments assume that amounts are fully advanced. The amounts reflected in the table for guarantees and letters of credit represent the maximum accounting loss that would be recognized at the reporting date if counterparties failed completely to perform as contracted.

	30 June 2019	31 December 2018
	AMD'000	AMD'000
Contracted amount		
Loan and credit line commitments	3,355,670	2,011,404
Credit card commitments	440,363	417,003
Guarantees and letters of credit	917,895	924,912
	4,713,928	3,353,319

The total outstanding contractual credit related commitments above do not necessarily represent future cash requirements, as these commitments may expire or terminate without being funded.

As at 30 June 2019 of these credit related commitments, AMD 3,228,327 thousand (31 December 2018: AMD 1,699,946 thousand) are to five customers (31 December 2018: five customers). This exposure represents a significant credit risk exposure to the Bank.

24 Contingencies

(a) Insurance

The insurance industry in the Republic of Armenia is in a developing state and many forms of insurance protection common in other parts of the world are not yet generally available. The Bank has up to AMD 500,000 thousand coverage for each type of insurance including for its premises and equipment, business interruption, third party liability in respect of property arising from accidents on the Bank's property or related to the Bank's operations. The Bank also has up to AMD 110,000 thousand insurance coverage of cash desks against physical damage and theft.

(b) Litigation

Management is unaware of any significant actual, pending or threatened claims against the Bank.

(c) Taxation contingencies

The taxation system in the Republic of Armenia is relatively new and is characterized by frequent changes in legislation, official pronouncements and court decisions, which are often unclear, contradictory and subject to varying interpretation by different tax authorities. Taxes are subject to review and investigation by a number of authorities, which have the authority to impose severe fines, penalties and interest charges. In the event of a breach of tax legislation, no liabilities for additional taxes, fines or penalties may be imposed by tax authorities once three years have elapsed from the date of the breach.

These circumstances may create tax risks in the Republic of Armenia that are substantially more significant than in other countries. Management believes that it has provided adequately for tax liabilities based on its interpretations of applicable Armenian tax legislation, official pronouncements and court decisions. However, the interpretations of the relevant authorities could differ and the effect on these financial statements, if the authorities were successful in enforcing their interpretations, could be significant.

25 Related party transactions

(a) Control relationships

The Bank’s parent Company is “Byblos Bank S.A.L”, which owns 100 % of the share capital. The parent Company produces publicly available financial statements. The party with ultimate control over the Bank is Francois Bassil.

(b) Transactions with the members of the Board of Directors and the Management Committee

Total remuneration included in personnel expenses for the periods ended 30 June 2019 and 30 June 2018 is as follows:

	30 June 2019	30 June 2018
	AMD’000	AMD’000
Short-term employee benefits	104,329	107,621

The outstanding balances and average effective interest rates as at 30 June 2019 and 31 December 2018 for transactions with the members of the Board of Directors and the Management Committee are as follows:

	30 June 2019	Average effective	31 December	Average effective
	AMD’000	interest rate, %	2018	interest rate, %
	AMD’000		AMD’000	
Statement of financial position				
Loans issued (gross)	202,983	10.2%	206,321	10.1%
Expected credit loss allowance	(534)		(741)	
Deposits received	1,395,099	4.1%	1,364,268	3.7%

Loans to related parties are in Armenian Dram and foreign currency and repayable from 1 to 20 years based on the type of the loan. Loans are secured by the appropriate type of collateral, as presented in Note 12 (c) (iii).

Amounts included in profit or loss in relation to transactions with the members of the Board of Directors and the Management Committee for the periods ended 30 June 2019 and 30 June 2018 are as follows:

	30 June 2019 AMD'000	30 June 2018 AMD'000
Profit or loss		
Interest income	5,275	5,729
Interest expense	(14,178)	(11,925)
Credit (loss)/release	207	(15)

(c) Transactions with other related parties

Other related parties include the Parent company and its fellow subsidiaries and non-controlling shareholders. The outstanding balances and the related average effective interest rates as at 30 June 2019 and related profit or loss amounts of transactions for the period ended 30 June 2019 with other related parties are as follows:

	Parent company		Other subsidiaries of the parent company		Other companies related with the parent company		Total AMD'000
	AMD'000	Average effective interest rate, %	AMD'000	Average effective interest rate, %	AMD'000	Average effective interest rate, %

Cash and cash equivalents held with related parties are not secured.

26 Fair values of financial instruments

The Bank measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements:

- Level 1: quoted market price (unadjusted) in an active market for an identical instrument.
- Level 2: inputs other than quotes prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

- Level 3: inputs that are unobservable. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The estimated fair values of all financial instruments except for AMD denominated loans to customers and current accounts and term deposits from customers as at 30 June 2019 and 31 December 2018 approximate their carrying amounts.

The fair values of loans to customers and current accounts and term deposits are higher /lower than their carrying values of AMD 27,713,783 thousand (31 December 2018: AMD 34,744,258 thousand) and AMD 57,134,338 thousand (31 December 2018: AMD 53,623,256 thousand) by AMD 1,483,796 thousand (31 December 2018: AMD 1,857,364 thousand lower) and AMD 28,502 thousand (31 December 2018: AMD 115,576 thousand lower) respectively, as at 31 December 2018. The fair value measurements of loans to customers, current accounts and term deposits from customers are categorized into Level 2 respectively in the fair value hierarchy.

The table below analyses financial instruments measured at fair value at 30 June 2019, by the level in the fair value hierarchy into which the fair value measurement is categorised. The amounts are based on the values recognized in the statement of financial position:

AMD'000	Level 1	Level 2	Level 3	Total
Investment securities				
- Debt instruments at FVOCI		33,303,802	-	33,303,802

The table below analyses financial instruments measured at fair value at 31 December 2018 by the level in the fair value hierarchy into which the fair value measurement is categorised. The amounts are based on the values recognized in the statement of financial position:

AMD'000	Level 1	Level 2	Level 3	Total
Available-for-sale financial assets				
- Debt instruments	-	30,941,395		30,941,395

The estimates of fair value are intended to approximate the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. However given the uncertainties and the use of subjective judgment, the fair value should not be interpreted as being realizable in an immediate sale of the assets or transfer of liabilities.

Valuation techniques include net present value and discounted cash flow models, comparison to similar instruments for which market observable prices exist and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premiums used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices. The objective of valuation techniques is to arrive at a fair value determination that reflects the price of the financial instrument at the reporting date that would have been determined by market participants acting at arm's length.
